35th DIGITAL AVIONICS SYSTEMS CONFERENCE

Enabling Avionics for UAS/UTM
(UAS Traffic Management)

www.dasconline.org

35th Digital Avionics Systems Conference
"Enabling Avionics for UAS/UTM"
EXHIBITOR INFORMATION

Position your organization as a thought leader in the industry, foster technology knowledge, and connect with the people who move our industry forward.

- Your participation provides you the opportunity to show that your organization is relevant to what is important, interesting, and developing in avionics and aviation, including UAS and traffic management, to major players gathered together in a same location.
- This is an IEEE/AIAA conference and the 35th DASC —It is a conference that has a long, established role as a leader in these technical fields and is organized by the two most relevant and recognized societies in aviation and avionics while offering a program that is uniquely practical in its mix of avionics industry and academics and not dominated by esoteric academic topics
- The DASC provides numerous opportunities including technical sessions, interactive forums, plenary and panel sessions, workshops, technology exhibitors, and a wide variety of other technical activities to connect with other members of the avionics/aviation community. No other event in the avionics field offers access to as many industry or academic experts, or provides as good a forum to exchange ideas and meet the people who move our industry forward.

Exhibit Fee: The fee for an exhibit booth (only) is $2,300. Exhibit includes 8' X 10' booth (with table and 2 chairs) and inclusion of exhibitor information in the conference packet. The exhibit fee is included with any DASC35 sponsorship package ($2,500 minimum).

When: September 25 -29, 2016   **Where:**   Hyatt Regency Sacramento
1209 L Street
Sacramento, CA, USA

Estimated Attendance: 300
